

## Ignite Gallery User Guide – Joomla

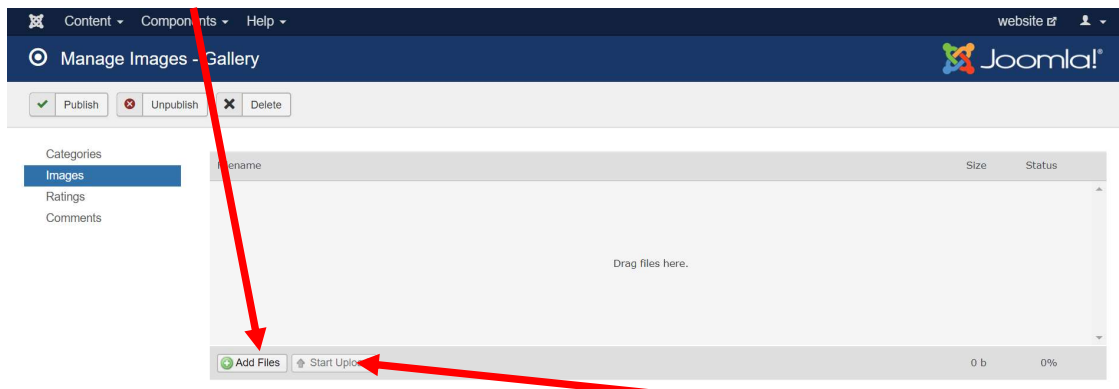

Go to Components > Ignite Gallery from the menu

Click on manage images

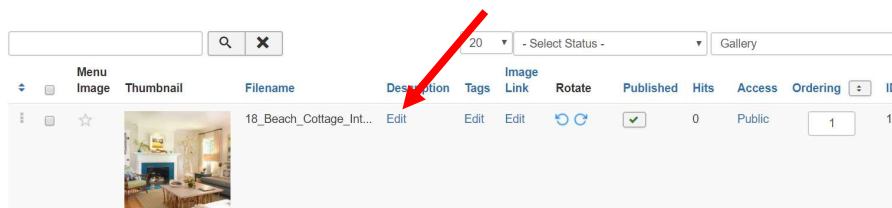

Click on add files

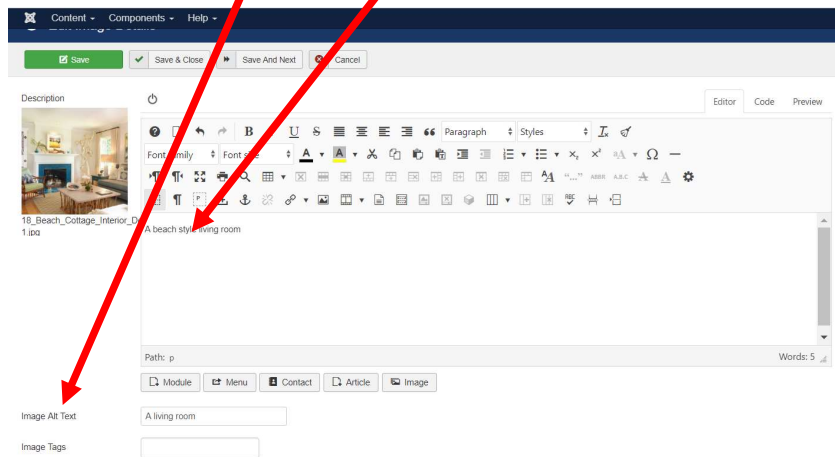

Find the image files from your computer and then click on upload. The image(s) appear below this window.

You can edit the description for your images

You should add an 'alt tag' and a description if you people to see a description in the front end of your site.

Save your image and it appears on the front of the website
